

ACKNOWLEDGMENTS

PRAXES 49, 51, and 52 offer advice based on Jonathan Amsterdam's "Really Understanding Java Threads" presentation given at the 1999 SIGS Object Expo conference in New York, New York.

PRAXIS 54 was inspired by Alan Holub's article, "Programming Java threads in the real world, Part 2," in the October 1998 *JavaWorld*. This article is found at

<http://www.javaworld.com/javaworld/jw-10-1998/jw-10-toolbox.html>

PRAXIS 56 was inspired by the article, "Multithreaded assignment surprises," by Steve Ball and John Miller Crawford in the September 1998 issue of *Java Report*.

PRAXES 59 and 60 were influenced by Dion Gillard's "Interfaces and Multiple Inheritance in Java" presentation given at the 1997 Colorado Software Summit Java conference in Keystone, Colorado.

PRAXIS 67 was inspired by several conversations with Bill Field.

Corrections and Updates

Several people have graciously provided me with corrections, clarifications, and improvements that I have incorporated into new printings of the book. They are: Tara Haggar, Ed Ford, Don Flores, David Wendt, Jean-Michel Decombe, David Biesack, Dominik Gruntz, Michael Bracuti, Rex Jaeschke, Jim Yingst, and Paul Keyser. The complete list of changes can be found in the errata document located as a link off of this book's web page on the Addison-Wesley Web site.
