

## Table of Contents

<b>1 ColdFusion Starts Here</b>	<b>1</b>
The History	1
ColdFusion MX Overview	2
Summary	5
<b>2 Preparing Your Environment</b>	<b>7</b>
Installing and Configuring ColdFusion	7
Working with Dreamweaver MX	10
Integration of ColdFusion Studio	22
Summary	34
<b>3 Before You Begin Coding—     Application Planning</b>	<b>35</b>
Application Architecture	36
Application Layers	42
Resource Planning	51
Development Methodologies	62
Summary	74
<b>4 Fundamentals of ColdFusion     Development</b>	<b>75</b>
Basic CFML	76
Bringing Data to the Browser	88
Interacting with Database Records	100
Summary	109
<b>5 Reusing Code</b>	<b>111</b>
CFINCLUDE	111
Custom Tags	116
CFX Custom Tags	119
User-Defined Functions (UDFs)	119
Summary	131

- 6 ColdFusion Components 133**
  - Building Your First CFC 134
  - Advanced ColdFusion Component Development 152
  - Summary 164
  
- 7 Complex Data Types 165**
  - Using CFDUMP 165
  - Queries 167
  - Lists 171
  - Arrays 177
  - Structures 183
  - Summary 187
  
- 8 Application Framework 189**
  - Web Statelessness 189
  - Locking Shared Variable Access 190
  - Application Framework 194
  - Application Variables 197
  - Session Variables 200
  - User Sessions 200
  - Server Variables 205
  - Cookies 206
  - Client Variables 209
  - Summary 214
  
- 9 Error Handling 215**
  - Error Types 216
  - Try/Catch/Throw Routines 219
  - Custom Errors 224
  - Site-Wide Error Handlers 228
  - Summary 228
  
- 10 Regular Expressions 229**
  - Basic Syntax 230
  - Metacharacters 230
  - POSIX Character Classes 232
  - Finding Strings 234
  - Replacing Strings 237
  - Summary 239

- 11 Working with Email 241**
  - Preparing Your Environment 242
  - CFMAIL 246
  - CFPOP and Message Management 251
  - Summary 254
  
- 12 Working with Files 257**
  - CFFILE 257
  - CFFTP 263
  - CFDIRECTORY 266
  - CFREGISTRY 268
  - Summary 272
  
- 13 CFScript 273**
  - Benefits 274
  - CFScript Syntax 274
  - Commenting Code 275
  - Conditional Programming 275
  - Working with Data Structures 277
  - Looping 278
  - For Loop 278
  - Functions 282
  - Output 282
  - Handling Exceptions 283
  - Summary 285
  
- 14 Debugging 287**
  - Debugging and the ColdFusion Administrator 287
  - CFTRACE 291
  - Summary 295
  
- 15 CFML Coding: Best Practices 297**
  - Considering Code Maintenance 297
  - Coding for Performance 299
  - Summary 307

**16 Further Extending Your Applications 309**

Working the Web—the Power of *CFHTTP* and *CFCONTENT* 309

*CFOBJECT* and COM 318

Flash Remoting with ColdFusion 324

Summary 328

**17 Common Application Development Requirements 329**

Application Security 330

Content Management 342

E-Commerce 355

Personalization 364

Summary 366

**18 Enhancing Application Performance with Caching 367**

Caching Strategies 368

Summary 376

**19 Introduction to XML and ColdFusion MX 379**

XML 101 380

Understanding Document Type Definitions 388

Working with XML Schemas 393

XML Syntax Rules 399

Creating XML 399

Using XML with ColdFusion MX 405

Summary 410

**20 Advanced XML 413**

How ColdFusion Parses XML 413

Using XML-Related Technologies 425

Working with WDDX 438

Summary 444

- 21 Web Services and ColdFusion 445**
  - Web Service Basics 445
  - Communication 448
  - Description and Discovery 449
  - Finding Web Services with UDDI 449
  - Invoking a Web Service 449
  - Building Web Services 458
  - Other Web Service Options with ColdFusion 460
  - Summary 460
  
- 22 Leveraging J2EE 461**
  - A Bit of Background on J2EE 462
  - ColdFusion and JSP 462
  - Working with Java Classes and Java Beans 465
  - Dealing with Java Exceptions 470
  - Working with EJBs 471
  - Summary 473
  
- 23 Working with Databases 475**
  - Relational Databases 476
  - Working with SQL 485
  - Stored Procedures 492
  - Transactions 496
  - Summary 502
  
- 24 Advanced Database Interaction 505**
  - Dynamic SQL 506
  - Query Caching 511
  - Query of Queries (CFSQL) 518
  - Summary 521
  
- 25 Administering the ColdFusion Server 523**
  - Server Settings 524
  - Data and Services 537
  - Debugging and Logging 540
  - Extensions 546
  - Security 549
  - Summary 553

- 26 Performance Optimization and Scalability Planning 555**
  - Measuring Performance 555
  - Enhancing Scalability 557
  - Load Testing 558
  - Summary 562
  
- 27 Migration to ColdFusion MX 563**
  - Using the Code Compatibility Analyzer 564
  - Deprecated or Changed CFML Tags 567
  - Deprecated or Changed CFML Functions 569
  - Summary 569
  
- 28 ColdFusion Tips and Tricks 571**
  - Design for Reusability 571
  - Validating Data Received from the Client 572
  - Use *Application.cfm* to Make Your Code Faster and More Portable 573
  - Using Session Variables with Care 574
  - Protect Yourself 575
  - Establishing Standard Prefixes in Your ColdFusion Code 576
  - Server-Side Redirections in CFMX 576
  - Group Totals and Details in One Database Query 577
  - Storing and Displaying Hierarchical Data 580
  - Summary 583
  
- A Tag Reference 585**
  
- B Function Reference 691**
  
- Index 801**
