Part I Building Dynamic Sites

I	What Is a Dynamic Site?	5
	Dynamic Sites Defined	6
	So What's with a Dynamic Site?	7
	The Function of Dynamic Sites in Today's Internet	8
	Dynamic Site Tools	11
	The Skills	13
	Management	14
	Design	15
	Code	16
	Team Management	17
	Building the Team	17
	Asset Management	18
	Managing What You Have While You Create It	18
	Naming Conventions	18
	File Extensions	19
	Naming Images	20
	File Management Issues	21
	Managing What You Have When It Is Created	21
	File Management and Check In/Check Out in Dreamweaver MX 2004	21
	Using Check In/Check Out	23
	Summary	24
2	The Architecture of Dynamic Sites	27
	The Pancake Principle of Dynamic Site Architecture	28
	Keeping the Structure as Flat as Possible	29
	Let the Software Do the Work	29
	Symbols in Freehand MX, Flash MX 2004, and Fireworks MX 2004	30
	Moving Symbols Between the Applications	31
	Moving Freehand MX Symbols to Flash MX 2004	34
	Using Flash MX 2004 Components	37
	Using Snippets in Dreamweaver MX 2004	38
	Dreamweaver and ColdFusion Markup Language	41
	The Database/ColdFusion MX Connection	41

Complexity vs. Simplicity	43
Complex Sites	44
Levels of Information	45
Interactivity Issues	45
Navigation Issues	46
Flat Sites	46
Levels of Information	47
Interactivity Issues	48
Navigation Issues	48
Summary	50
3 Planning a Dynamic Site	53
Want vs. Need	54
Defining Exactly What Is Needed	55
Developing the Project Scope	56
Identifying the Technologies	57
The Creative Brief	58
What Is a Creative Brief?	59
How The Brief Is Developed	59
The Technical Brief	61
Rationales for the Features	62
Cool vs. Practical	62
Timelines/Deadlines	63
The Communication Process	64
Client/Team Communication	64
Creating a Chat Room in Flash MX 2004	65
The Flash MX Professional 2004 Project Panel	66
Defining a Site in Flash MX Professional 2004	66
Defining and Working with a Project in Flash MX 2004	68
Setting Up a Chat Room in Flash MX 2004	70
Building the Chat Room in Flash MX 2004	73
Summary	76
4 Planning the Data for a Dynamic Site	79
Planning the Data	80
Flowcharting the Logic	81
Data Planning	82
Using the Freehand MX Connector Tool	84
What Is a Flow Chart?	89
Why Use a Flow Chart?	89
Flow Chart Symbols	90

Planning the Community Center Site	93
The Logic for the Tour	93
The Logic for the Online Booking Area	94
The Logic for the Meeting Facility	95
Getting Ready to Work	96
What Tools Will Be Needed?	97
What Data Types Are Needed?	98
How Will the Data Look?	98
How Will It Be Managed?	98
Summary	99

5 Planning the Look 103

Creating the Site Model	104
Modeling the Server-Side Workflow for Flash MX 2004	105
Mapping a Flash MX 2004 Login	107
Accounting for Dynamic Data on a Site Map	109
Wireframing	111
Wireframing Tools and Techniques	111
Building Wireframes in Fireworks MX 2004	111
Building Wireframes in Freehand MX	116
Building Wireframes in Dreamweaver MX 2004	119
The Freehand MX, Fireworks MX 2004, and Dreamweaver MX 2004 Round Trips	123
Comprehensive Designs	126
Creating the “Comps” in Fireworks MX 2004	127
Prototyping	129
Using the Action Tool in Freehand MX	130
Removing an Action	133
Testing and Publishing Actions	133
Summary	134

Part II Building the Interactive Tour

6 Creating the Tour Assets 139

The Plan	140
The Key Event Schedule	141
Imaging in Fireworks MX 2004	142
The Fireworks MX 2004 Interface	143
Using the Replace Color Tool	145
Using the Red Eye Removal Tool	148
Using Auto Shapes	150

Building Buttons	153
The Studio MX 2004 Workflow	157
Fireworks MX 2004 to Flash MX 2004	159
Creating the Oakbridge Community Center Masthead	161
Creating the Oakbridge Community Center Logo	168
Finishing the Masthead	172
Batch Process is a Developer's Best Friend	175
Summary	178
7 The Elements of the Dynamic Page	183
Dreamweaver MX 2004 and Dynamic Data	184
Defining the Oakbridge Community Center Site	186
Defining a Dynamic Site in Dreamweaver MX 2004	186
Building Templates in Dreamweaver MX 2004	191
Dreamweaver MX 2004 and Templates	191
Building a Template in Dreamweaver MX 2004	191
Adding Editable Regions to a Dreamweaver MX 2004 Template	193
Constructing a Template	195
Converting an HTML Page to a Dreamweaver MX 2004 Template	197
Creating Cascading Style Sheets in Dreamweaver MX 2004	200
Cascading Style Sheets and Dreamweaver MX 2004	200
Building CSS in Dreamweaver MX 2004	201
Creating Links Using CSS	204
Summary	207
8 Building the Data	211
Databases and Studio MX 2004	212
Databases and Platforms	213
Database Systems	213
MySQL	213
MS Access	213
Databases and Dreamweaver, Flash, and Director	214
Defining the Data	214
Presenting Data Quickly and Efficiently	215
Creating the Database Application in MySQL (Mac Users)	216
Creating the Database Application in MySQL (PC Users)	218
A ColdFusion MX Overview	221
Configuring ColdFusion MX	222

ColdFusion MX on a Mac? Why Not!	222
Going Online with ColdFusion MX	223
Building a Simple Back-End	225
Creating Pages to Display Your Data	227
Creating a Simple Data Entry Page	230
Creating the Capability to Modify and Delete Your Entered Data	232
Creating the Edit Page	232
Creating the Delete Page	236
Summary	238
9 Flash Remoting	241
What It Is	242
The Technology	243
The Technical Requirements	244
Flash/ColdFusion	244
Flash Remoting in Ten Minutes	245
Remoting Checklist	245
Common Checklist Questions	245
Step 1: Building the Database	246
Step 2: Connecting the Database to ColdFusion MX	248
Writing the Dreamweaver MX 2004 Code That Links to ColdFusion MX	250
Step 3: Building the Flash MX 2004 Movie	253
Testing and Finishing	257
Summary	258
10 Assembling the Tour	261
Choosing Fonts	262
Designing the Look for the Applications	264
Assembling the Dreamweaver MX 2004 Pages	268
Constructing the Templates	268
Assembling the Template in Dreamweaver MX 2004	270
Building CSS in Dreamweaver MX 2004	274
Preparing a Template for Dynamic Content	281
Setting the Style for the Content in the Optional Region	284
Connecting to the Database Through the Applications Panel	285
Getting Dynamic with the Oakbridge Community Center	286
Adding the Images to the Content Area	288
Using CSS to Style the Editable Areas	291
Testing the Page	294
Summary	297

Part III Building the Booking Facility

11	Creating the Booking Facility Assets	303
	Director vs. Flash	304
	The Plan	305
	The Logic Behind the Booking Facility	307
	Imaging in Fireworks MX 2004	309
	The Fireworks MX 2004/Director MX Connection	309
	From Fireworks MX 2004 to Director MX	311
	Fireworks MX 2004, Layers, Behaviors, and Director MX	313
	Roundtrip Editing	314
	The Flash MX 2004/Director MX Connection	317
	Importing and Playing a Flash MX 2004 File in Director MX	318
	Round Trip Editing Between Director MX and Flash MX 2004	321
	Flash/Director Communication	322
	Summary	325
12	Flash Communication Server MX: Moving Dynamic Data Through Director MX and Flash MX 2004	327
	The Movement of Dynamic Data Through and Out of Director MX and Flash MX 2004	328
	Goodbye Multiuser Server; Hello Flash Communication Server	329
	Director MX and the Flash Communication Server	330
	How Director MX and Flash MX 2004 “Talk” to Each Other	332
	Setting Up for Two-Way Communication	334
	Making the Connection	335
	Establishing the Data Flow	336
	Closing the Streams Between Director and the Flash Communication Server	338
	Flash Communication Server to Director Communication	339
	Interface Issues	339
	Designing Director Presentations for Dynamic Data	341
	Summary	342

13	Assembling the Booking Application in Flash MX 2004	345
	Planning the Project	346
	Creating the Booking Facility Database	349
	Creating an ActionScript Document in Dreamweaver MX 2004	350
	Building the ColdFusion MX “Facilities” Component	359
	Building the Booking Facility in Flash MX 2004	363
	Building the Calendar	365
	Building the Booking Movie Clip	367
	Finishing Up	370
	Summary	374
14	Assembling the Booking Application in Director MX	377
	A “Dispassionate” Look at the Differences	378
	Accessibility	379
	Video Integration and Extensibility	380
	Scripting	382
	Which to Choose?	382
	Wrapping the Booking Facility in Director MX	382
	Creating the Director MX Wrapper	383
	Adding the Navigation	386
	Creating a Shockwave Player for Web Playback	389
	Summary	390

Part IV Building the Online Meeting Facility

15	Embedding and Streaming Video in Flash MX 2004	395
	Digital Video Overview	397
	Video in Flash MX 2004	397
	Frame Size	398
	Movie Length	398
	Frame Rate	398
	Compression	398
	Data Rate	399
	Incorporating Video into Flash MX 2004	399
	Importing Digital Video into Flash MX 2004	400
	Using the Flash MX 2004 Video Import Wizard	400
	Using the New Video Behaviors to Control a Flash MX 2004 Video	405
	Adding Video Behaviors to the Buttons	407

	Streaming Video Through the Flash Communication	
	Server MX	409
	Preparing to Stream	409
	Preparing the Flash MX 2004 Movie	410
	Coding for Video Streaming	411
	Summary	413
16	Building the Chat Room	417
	Chat Issues	418
	How Many Users Will be Involved?	419
	How Will It Be Moderated?	420
	What Control Mechanisms Will Be Built In?	421
	Designing the Room	421
	Building the Chat Room	423
	Assembling the Chat Room in Flash MX 2004	425
	Finishing the Design Work	428
	Dealing with a Potential User Issue	428
	Adding the Chat to Dreamweaver MX 2004	430
	Summary	430
17	Flash MX 2004 and Real-Time, Two-Way Communication	433
	Streaming and How We Got from “There” to “Here”	434
	Design Issues	435
	Functionality	436
	Usability	437
	Building the Streaming Audio Communicator in	
	Flash MX 2004	438
	Building the Streaming Video Communicator in	
	Flash MX 2004	439
	Summary	442
18	Building the Meeting Application	445
	The Competitive Advantage of Flash MX 2004	446
	Jordan’s Epiphany	448
	The “Story” Behind the Meeting Room	450
	The Technologies That Make the Meeting Room Work	451
	Constructing the Meeting Room	452
	Adding the Communication Components	457
	Adding the Scripts	460
	Summary	460

Part V Pulling It All Together

19	Debugging and Testing	465
	Debugging Issues	466
	Using ColdFusion MX's Debugging Options	467
	The ColdFusion MX Administrator Debugging Settings	468
	The Debugging IP Addresses Page in ColdFusion MX	469
	ColdFusion MX Logs	470
	Email from ColdFusion MX	471
	Optimizing Dreamweaver MX 2004 Code	473
	Using the Clean Up HTML/XHTML Command	473
	Balancing JavaScript Braces	474
	Director MX Debugging Tools	476
	Using the Director MX Debugger	476
	Using the Script Window	478
	Debugging in Flash MX 2004	480
	Using the Trace Function	480
	The Flash MX 2004 Debug Panel	481
	Usability/Functionality	483
	Accessibility	484
	Accessibility and Dreamweaver MX 2004	484
	Accommodating Access	485
	The Testing Team and Its Responsibilities	487
	Browser Targeting and Link Checking in Dreamweaver MX 2004	488
	Summary	489
20	Deployment	493
	Ensuring Dynamic Components Are Working	494
	Checking Database Connectivity	495
	Uploading to the Remote Server	496
	Using FTP in Dreamweaver MX 2004	496
	Working with a Remote Site in Dreamweaver MX 2004	498
	Synchronizing Files	499
	Using Dreamweaver MX 2004 to Manage Contribute Sites	501
	Using a "Back-End" to Update Dynamic Pages	505
	Summary	509
	Index	513
