Reference critical business skills in an instant online.

SEARCH electronic versions of hundreds of books simultaneously.

BROWSE books by category. Peruse the latest titles from today's most authoritative business authors.

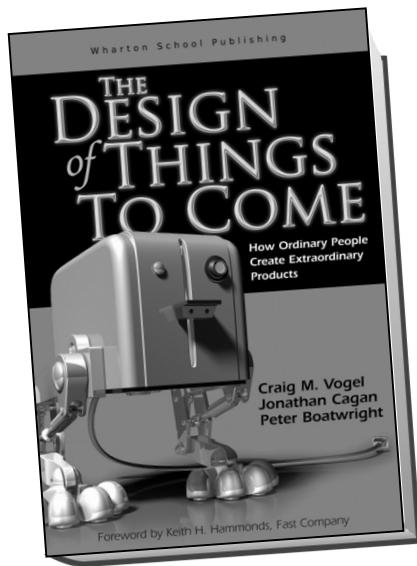

FIND answers in an instant!

The screenshot displays the Safari Business Books Online interface. At the top, there's a navigation bar with links for Home, My Safari, My Bookshelf, My Recent Searches, My Recent Pages, My Notes, My Bookmarks, and My Account. Below the navigation is a search bar with a 'Search' button and an 'Advanced Search' link. To the left of the main content area is a sidebar with sections for 'Browse by Category' (listing Current Affairs, Finance/Accounting, Human Resources, Management, Professional Skills, Quality, Sales/Marketing, and Technology) and 'Find a Specific Book' (with fields for Author, ISBN, Title, and Publisher). The main content area shows a 4x5 grid of book covers. Some visible titles include 'EXTENDED ENTERPRISE', 'ARTFUL MAKING', 'THE NEW PR TOOLKIT', 'The Value of Global Markets', 'CUSTOMER SHARE MARKETING', 'FAME & FORTUNE', 'PROFITS you can TRUST', 'New Six Sigma', 'RUTHLESS EXECUTION', 'Venture Capital Investing', 'WHEEL, DEAL, and STEAL', 'THE COMPETITIVE ADVANTAGE OF COMMON SENSE', 'IT'S Your MOVE', 'Decide & Conquer', 'Elder Planning', and 'Presenting to Win'.

Search Safari! Zero in on exactly the information you need to complete the task at hand - from creating killer presentations, to understanding how supply chains work, to honing your interview skills. Search across all books in the library simultaneously to pinpoint exactly the chapter, sentence and example you need. Read books from cover to cover. Or, flip right to the page you need.

The Design of Things to Come

How Ordinary People Create Extraordinary Products

BY CRAIG M. VOGL, JONATHAN CAGAN,
AND PETER BOATWRIGHT

The iPod is a harbinger of a revolution in product design: innovation that targets customer emotion, self-image, and fantasy, not just product function. You'll read the hidden stories behind BodyMedia's SenseWear body monitor, Herman Miller's Mirra Chair, Swiffer's mops, OXO's potato peelers, Adidas' intelligent shoes, the new Ford F-150 pickup truck, and many other winning innovations. You'll meet the innovators, learning how they inspire and motivate their people, as they shepherd their visions through corporate bureaucracy to profitable reality. These design revolutionaries have a healthy respect for the huge cultural and economic forces swirling around them, but they've gotten past the fear of failure, in order to surf the biggest waves—and deliver the most exciting breakthroughs. Along the way, the authors deconstruct the entire process of design innovation, showing how it really works, and how today's smartest companies are innovating more effectively than ever before. *The Design of Things to Come* will fascinate you—whether you're a consumer who's intrigued by innovation or an executive who wants to deliver more of it.

ISBN 0131860828, © 2005, 272 pp., \$26.95

Big Winners and Big Losers

The 4 Secrets of Long-Term Business Success and Failure

BY ALFRED A. MARCUS

What keeps great companies winning, year after year, even as yesterday's most hyped businesses fall by the wayside? It's not what you think—or what you've read. To find the real answers, strategic management expert Alfred Marcus systematically reviewed detailed performance metrics for the 1,000 largest U.S. corporations, identifying 3% who have consistently outperformed their industry's averages for a full decade. Many of these firms get little publicity: firms like Amphenol, Ball, Family Dollar, Brown and Brown, Activision, Dreyer's, Forest Labs, and Fiserv. But their success is no accident: they've discovered patterns of success that have largely gone unnoticed elsewhere. Marcus also identified patterns associated with consistently inferior performance: patterns reflected in many of the world's most well-known companies. Drawing on this unprecedented research, *Big Winners and Big Losers* shows you what really matters most. You'll learn how consistent winners build the strategies that drive their success; how they move towards market spaces offering superior opportunity; and how they successfully manage the tensions between agility, discipline, and focus. You'll learn how to identify the right patterns of success for your company, build on the strengths you already have, realistically assess your weaknesses, and build sustainable advantage one step at a time, in a planned and logical way.
