Warning and Disclaimer

Every effort has been made to make this book as complete and as accurate as possible, but no warranty or fitness is implied. The information provided is on an "as is" basis. The author and the publisher shall have neither liability nor responsibility to any person or entity with respect to any loss or damages arising from the information contained in this book or from the use of the CD or programs accompanying it.

When reviewing corrections, always check the print number of your book. Corrections are made to printed books with each subsequent printing. To determine the print number of your book, view the copyright page. The print number is the right-most number on the line below the "First Printing" line. For example, the following indicates that this is the 1st printing of this title and it was printed in May 2003.

First Printing: May 2003

139	First sentence: Answer B is correct.	First sentence: Answers A and B are correct.
204	Auditing and Implementing Security Settings section, first sentence: The Security Templates console can also be used to audit and track potential security...	Auditing and Implementing Security Settings section, first sentence: The Security Templates console can be used to set up auditing and track potential security...
243	Answer 40: D	A
254	Replace Question 40	Answer A is correct. Group Policies are used to roll out applications to users. IIS is a Web site and application server; therefore answer B is incorrect. Terminal Services delivers applications to clients' desktops and can also operate in remote administration mode; therefore answer C is incorrect. SUS is Microsoft's Software Update Service and should be used for rollouts of updates and security fixes to client computers; therefore answer D is incorrect.
293	Question 27, replace last sentence	SUS is Microsoft's Software Update Service, which can be used to deliver updates and security fixes to client desktops and doesn't operate in Remote Administration mode; therefore answer D is incorrect.

This errata sheet is intended to provide updated technical information. Spelling and grammar misprints are updated during the reprint process, but are not listed on this errata sheet.
