Symbols

- (minus sign)
 - in filenames of layer files, 489
 - in .instance files, 88–89
- : colon
 - in manifest files, 276–278, 367
 - in warning and error lines, 482
- / (forward slash)
 - as directory separator, 81
 - in hyperlinks, 362
 - in ordering attributes, 79
- . (dot), in .instance files, 88–89
- " (double quote), for filenames in command line, 470
- () (parentheses), in regular expressions, 482
- [] (square brackets), in regular expressions, 482
- { } (curly braces), in localized strings, 570
- * (asterisk)
 - for marking unsaved files, 516
 - in regular expressions, 482
- \ (backslash)
 - as directory separator, 81
 - as escape symbol, 470, 482
- & (ampersand), in mnemonics, 570–571
- + (plus sign), in regular expressions, 482

A

- AbsoluteLayout class, 252
- AbstractAction class, 190–191
- AbstractLookup class, 59–61, 176
- AbstractNode class, 166, 169, 173
- access modifiers, 17
- Action class, 75, 98, 163, 190–199, 313
 - registry of, 87, 100
- Action Type** panel, 85, 342, 466
- Action** wizard, *see* **New Action**
- actionPerformed() method, 31, 321
- actions, 190–199
 - adding to
 - menus, 84–88, 190, 196, 217
 - palettes, 311, 332–335
 - toolbars, 190, 196
 - always enabled, 85, 342
 - conditionally enabled, 517
 - context-sensitive, 63, 197–199
 - creating, 6
 - default, 294, 527
 - for hyperlinks, 356
 - installing, 196–197
 - keybindings for, 196–197
 - standard, 195–196
- Actions API, 195–196

- Actions/ folder, 87, 99–100, 217
- actionsGlobalContext() method, 62–65, 128–129, 173, 221
- ActiveEditorDrop class, 344, 347–350
- Add Module Dependency** window, 19, 109, 473
- add() method, 220
- addListDataListener() method, 118
- addNotify() method, 171, 184
- AddPolicy class, 167
- addPropertyChangeListener() method, 121–122, 227, 309, 333, 390
- Advanced Options** window, 87, 100, 215, 370, 376, 384
- Advanced/ folder, 99
- AdvancedOption class, 388–389, 394
- allInstances() method, 45, 51–53
- allItems() method, 52–53
- ampersand, *see* &
- Annotatable interface, 378
- Annotation API, 465, 484
- Annotation class, 378, 485
- annotations, 367–384
 - attaching to
 - line parts, 382–383
 - lines, 379–381, 485
 - configuring, 487
 - customizing, 370
 - describing, 369, 377–379
 - detaching, 379–381, 485, 490
 - glyphs for, in the left sidebar, 367–369, 371, 484
 - highlighting, 372, 383
 - in HTML Tidy, 484–490
 - installing, 376
 - marks for, in the right sidebar, 367–368, 373–374, 484
 - names of, 370, 378
 - priority levels of, 375
 - registering, 375–376
 - tooltips for, 367, 378, 484
 - underlining, 373
- AnnotationTypes/ folder, 375
- Apache's Commons Logging library, 19–20
- API Versioning** panel, 104, 219, 462
- APIs (Application Programming Interfaces)
 - creating, 542–544

 for components, 310
 in palettes, 318, 347
 TopComponent class, 54, 62, 65–66, 113, 126, 137–147, 177–178, 204, 238, 249, 517, 534
 adding
 drag-and-drop handlers to, 325
 palettes to, 312, 344
 display names of, 264
 IDs of, 160
 methods in, 139–140
 for node displaying, 178–181
 nondeclarative, 152
 opening, 152–153
 persisting state across sessions, 145–147
 TopComponent groups, 158–161
 TopComponentGroup class, 141, 161
 TopComponentTest module, 249
 toString() method, 515
 Transferable interface, 330–331
 transferables, 324, 330
 TreeTableView class, 178–179

U

UI components, *see* components
 UI Utilities API, 234, 256, 357, 526, 570
 UI/ folder, 100
 UIManager class, 175
 Unicode encoding, 174, 181
 unit tests, 227–234
 running, 233–234, 557
 unregisterValidator() method, 31, 46
Update Center wizard, 1, 273, 453–456, 458–459, 461–462, 524
 update centers, 453–463
 distributing, 458–461
 manually, 459–461
 via a module, 458–459
 downloading files from, 461–462
 update() method, 390, 396
 updateRootNode() method, 188–189
 updates.xml file, 456

URLHandlerFactory class, 27
URLs, 91–93
URLStreamHandler class, 40
userdirs, 77, 154–155, 158, 396
Utilities API, 169, 171, 176, 292, 358, 404, 526
Utilities class, 223–224, 303

V

validate() method, 46
Validations class, 31, 46–47
Validator API, 31, 33
Validator interface, 30–33, 46–47, 553
validators, 30–33, 463
valueChanged() method, 131
View_hidden file, 81, 83
views
 design (visual), 238, 242, 253, 388, 394
 creating, 269–271
 detail, 67, 135, 165, 176, 182–188, 195
 explorer, 163, 177–178, 184–190, 249–250
 form editor, 143
 frequency-domain, 545
 list, 133, 163, 187
 master, 67, 135, 165, 184–190
 runtime, 239
 source, 238, 247, 249, 253
 creating, 261–268
 standalone, 184
 switching between, 253
 synchronizing, 253, 255
 tree, 133, 163, 186, 238
 eliminating Nodes from, 194–195
 expansion handles in, 166, 171
VisibilityPolicy class, 167
Visual class, 269–271
VisualPanel class, 509
volatile keyword, 118, 120

W

warning-glyph.gif file, 371
WAV files, 521–522
 editing, 534–535

 viewing, 521, 533–535
 zero-sample file, 526

WavComponent class, 534–541
WavCookie interface, 543–544
WavDataObject class, 529–532, 543
WavOpenSupport class, 532, 534–536, 543, 548
WavPanel window, 533–534
WavPanelMultiViewDescriptor class, 536–538, 543–544
WavSaveCookie class, 532
wavsupport module, 526–530, 542–545
WavTemplate.wav file, 526
wavutils module, 523, 526, 530, 533, 545
WavViewDescriptor interface, 543–545
weakFileChangeListener() method, 121–122, 226
WeakListeners class, 122, 227
WeakPCL class, 121–122
WeakReference class, 51, 110–111
Web APIs, 401, 404
Web frameworks, 91–93, 399–427
 configuration files for, 401
 configuration panels for, 406–413
 display names for, 401
 registering, 401, 404–406
 selected in the **New Project** wizard, 424–426
 source structure for, 400
 testing, 427
Web Service Client wizard, 431–432
Web services, 429–440
 clients for
 creating, 430–435
 integrating, 435–440
 code completion for, 439–440
 testing, 430–431
 URLs for, 430
Web startable, *see* JNLP
web.xml file, 400–401, 407, 426
WebFrameworkProvider class, 401–406, 410–411, 413, 419
 dependencies for, 404, 414
 implementations of, 402–404
WebModule class, 414
while statement, 16
Wicket Configuration panel, 407–410, 422
Wicket framework, 400, 417–418, 422

WicketApplication.java file, 419–421
 WicketConfigurationPanel class,
 407–411
 WicketConfigurationPanelVisual
 class, 407, 412
 WicketConfigUtilities class, 414–415
 WicketFrameworkProvider class,
 402–404, 410–411, 414, 419
 WicketHyperlinkProvider class, 357
 WicketVisualPanel1 class, 407
 WicketWebFrameworkSupport class, 404
 WicketWizardAction class, 407
 WicketWizardPanel1 class, 407
**Window Component wizard, see New
 Window Component**
 window managers, 136, 145, 481, 556
