

Master
Data Stores

```
graph LR; MD[Master Data Stores] --> TD[Transactional Data Stores]; MD --> OD[Operational Data Stores]; MD --> DIW[Data/Information Warehouses]; MD --> DM[Data Marts]; MD --> ID[Information Delivery]; TD --> OD; OD --> DIW; DIW --> DM; DM --> ID;
```

The diagram illustrates a data architecture where a central 'Master Data Stores' block on the left feeds into five stacked data layers on the right. The layers, from bottom to top, are: Transactional Data Stores, Operational Data Stores, Data/Information Warehouses, Data Marts, and Information Delivery. Arrows point from the Master Data Stores to each layer, and additional arrows point upwards between the layers, indicating a sequential flow of data processing.

Information Delivery

Data Marts

Data/Information Warehouses

Operational Data Stores

Transactional Data Stores
