

Class	HTMLUncaughtScriptExceptionEvent
Public Properties	exceptionValue : * stackTrace : Array HTMLUncaughtScriptExceptionEvent() clone():Event
Public Methods	HTMLUncaughtScriptExceptionEvent(exceptionValue:*) clone():Event

Class	NativeWindowBoundsEvent
Public Properties	afterBounds : Rectangle beforeBounds : Rectangle
Public Methods	NativeWindowBoundsEvent(type:String, bubbles:Boolean = false, cancelable:Boolean = false, beforeBounds:Rectangle = null, afterBounds:Rectangle = null) clone():Event toString():String

Class	Class: DRMAuthenticationCompleteEvent
Public Properties	Public Properties: domain : String serverURL : String token : ByteArray
Public Methods	DRMAuthenticationCompleteEvent(type:String, bubbles:Boolean = false, cancelable:Boolean = false, inServerURL:String = null, inDomain:String = null, inToken:ByteArray = null)

Class	Class: NativeWindowDisplayStateEvent
Public Properties	afterDisplayState : String beforeDisplayState : String
Public Methods	NativeWindowDisplayStateEvent(type:String, bubbles:Boolean = true, cancelable:Boolean = false, beforeDisplayState:String = "", afterDisplayState:String = "") clone():Event toString():String

Class	ScreenMouseEvent
Public Properties	screenX : Number screenY : Number
Public Methods	ScreenMouseEvent(type:String, bubbles:Boolean = false, cancelable:Boolean = false, screenX:Number = NaN, screenY:Number = NaN, ctrlKey:Boolean = false, altKey:Boolean = false, shiftKey:Boolean = false, buttonDown:Boolean = false, commandKey:Boolean = false, controlKey:Boolean = false) clone():Event toString():String

Class	DRMErrorEvent
Public Properties	subErrorID : int
Public Methods	DRMErrorEvent(type:String, bubbles:Boolean = false, cancelable:Boolean = false, inErrorDetail:String = "", inErrorCode:int = 0, nsubErrorID:int = 0, inMetadata:DRMContentData = null) clone():Event toString():String

Class	DRMAuthenticationErrorEvent
Public Properties	Public Properties: domain : String serverURL : String subErrorID : int
Public Methods	DRMAuthenticationErrorEvent(type:String, bubbles:Boolean = false, cancelable:Boolean = false, inDetail:String = "", inErrorID:int = 0, inSubErrorID:int = 0, inServerURL:String = null, inDomain:String = null)

Class	SQLEvent
Public Properties	
Public Methods	SQLEvent(type:String, bubbles:Boolean = false, cancelable:Boolean = false) clone():Event

Class	DRMStatusEvent
Public Properties	contentData : DRMContentData detail : String isAnonymous : Boolean isAvailableOffline : Boolean isLocal : Boolean offlineLeasePeriod : uint policies : Object voucher : DRMVoucher voucherEndDate : Date
Public Methods	clone():Event toString():String

Class	OutputProgressEvent
Public Properties	bytesPending : Number bytesTotal : Number
Public Methods	OutputProgressEvent(type:String, bubbles:Boolean = false, cancelable:Boolean = false, bytesPending:Number = 0, bytesTotal:Number = 0) clone():Event toString():String

Class	InvokeEvent
Public Properties	arguments : Array
Public Methods	currentDirectory : File InvokeEvent(type:String, bubbles:Boolean = false, cancelable:Boolean = false, dir:File = null, argv:Array = null) clone():Event

Class	DRMAuthenticationEvent
Public Properties	authenticationType : String header : String netstream : NetStream passwordPrompt : String urlPrompt : String usernamePrompt : String
Public Methods	DRMAuthenticationEvent(type:String, bubbles:Boolean = false, cancelable:Boolean = false, header:String = "", userPrompt:String = "", passPrompt:String = "", urlPrompt:String = "", authenticationType:String = "", netstream:NetStream = null) clone():Event toString():String

Class	SQLExceptionEvent
Public Properties	error : SQLException
Public Methods	SQLExceptionEvent(type:String, bubbles:Boolean = false, cancelable:Boolean = false, error:SQLException = null) clone():Event toString():String

Class	SQLUpdateEvent
Public Properties	rowID : Number table : String
Public Methods	SQLUpdateEvent(type:String, bubbles:Boolean = false, cancelable:Boolean = false, table:String = null, rowID:Number = 0) clone():Event

Class	Class: NativeDragEvent
Public Properties	Public Properties: allowedActions : NativeDragOptions clipboard : Clipboard dropAction : String
Public Methods	NativeDragEvent(type:String, bubbles:Boolean = false, cancelable:Boolean = true, localX:Number = NaN, localY:Number = NaN, relatedObject:InteractiveObject = null, clipboard:Clipboard = null, allowedActions:NativeDragOptions = null, dropAction:String = null, controlKey:Boolean = false, altKey:Boolean = false, shiftKey:Boolean = false, commandKey:Boolean = false) clone():Event toString():String

Class	BrowserInvokeEvent
Public Properties	arguments : Array isHTTPS : Boolean isUserEvent : Boolean sandboxType : String securityDomain : String
Public Methods	BrowserInvokeEvent(type:String, bubbles:Boolean, cancelable:Boolean, arguments:Array, sandboxType:String, securityDomain:String, isHTTPS:Boolean, isUserEvent:Boolean) clone():Event

Class	FileListEvent
Public Properties	files : Array
Public Methods	FileListEvent(type:String, bubbles:Boolean = false, cancelable:Boolean = false, files:Array = null)
