## A

- absolute references, cell formulas, 19**
- absorption costing, 428-432**
- accelerated depreciation, 344, 347**
- acceptable quality level (AQL), acceptance sampling, 235-240**
- acceptance sampling, 234**
  - CRITBINOM function, 237
  - operating characteristic curve, charting, 235-240
- accounting**
  - accrual
    - matching principle, 105-107
  - cash
    - matching principle, 106-107
  - purpose of, 11-12
  - types
    - accrual, 24-28
    - cash, 24
    - financial, 12-13
    - management, 12-13
- Accounts Payable ledger, subsidiary example, 92**
- accounts receivable, obtaining credit sales balances, 40-41**
- Accounts Receivable ledger, subsidiary example, 92**
- accrual accounting**
  - adjusting entries, 26-28
  - depreciation, 26-27
  - matching principle, 24-25, 105-107
- ACFs (autocorrelation function), 209-211**
- acquisition costs, determining fixed assets, 340**
- activity ratios, 149**
  - analyzing, 161-163
    - average collection period ratio, calculating, 161-162
    - inventory turnover ratio, calculating, 162-163
- actual costs, determining fixed assets, 341-342**
- Add Scenario dialog (Scenario Manager), 283-284**
- Add Trendline command (Chart menu), 190**
- adding new records to recordsets, 399-401**
- adjusted trial balances, working capital, 108-110**
- AdjustedCredits range, structuring income statements, 112**
- AdjustedDebits range, structuring income statements, 112**
- adjusting entries, accrual accounting, 26-28**
- ADO, updating databases, 402**
  - accessing objects, 403
  - defining connections, 404
  - summarizing code, 406
  - unique records, 405
- aging approach, doubtful credit accounts, 41-43**
- American Institute for Certified Public Accountants (AICPA), 355**
- Analysis ToolPak**
  - Exponential Smoothing tool, 200-201
  - moving average forecasts
    - creating, 188-189
- analyzing**
  - activity ratios, 161-163
  - cash flow, 116
    - example, 117-120
    - operating activities, 121-122

financial leverage, 308-310  
 Debt Ratio calculation, 309  
 Times Interest Earned calculation, 310  
 leverage ratios, 156-158  
 liquidity ratios, 159-161  
 operating leverage  
 business forms case study, 298-299  
 coffee sales case study, 304-306  
 comparison of degrees, 300-304  
 profitability ratios, 150-156  
 ratios, 125  
 statements, 125

**ANOVA (Analysis of Variance), 332**

**ARIMA (AutoRegressive Integrated Moving Average) model. See Box-Jenkins model**

**ARIMA.xls, 450**

**array formulas, 21**

**assets**  
 balance sheets, 31-32  
 depreciation  
 accelerated method, 344, 347  
 declining balance method, 345-347  
 double declining balance method, 348-349  
 straight-line method, 342-345  
 sum-of-year's-digits method, 351-352  
 variable declining balance method, 349-351

**Assets section (balance sheets), 79**

**association (regression analysis), 325-326**

**ATP (Analysis ToolPak), confidence intervals, 316**

**autocorrelation, forecasting via CORREL function, 202-203**

**automatic refreshes, external data ranges, 384-385**

**automating posting process, General Ledger, 93-100**

**average collection period ratio, calculating, 161-162**

**average cost method, inventory valuation, 52**  
 advantages/disadvantages, 71  
 electronics store case study, 58-62

**averages, 216**

## B

### balance sheets

assets, 31-32  
 Assets section, 79  
 cash flow analysis example, 118-120  
 closing the accounts, 47  
 common-size, converting to, 128-129  
 credit sales  
 doubtful accounts, 41-44  
 Current Assets, 32-33  
 accounts receivable balance, obtaining, 40-41  
 cash balance, obtaining, 34-35  
 prepaid expenses balance, obtaining, 44-45  
 prepaid expenses insurance, handling, 45-46  
 current liabilities, 33, 102-103  
 designing, 32-33  
 expense accounts, closing, 49  
 Fixed Assets, 32-33  
 inventory account, closing, 48-49  
 inventory flow, 48  
 liabilities, 31-32  
 Liabilities and Owner's Equity section, 79  
 restricted cash accounts, 39-40  
 revenue account, closing, 49  
 typical design of, 32  
 working capital  
 calculating, 108-113  
 changes, comparing, 113-116  
 structuring for, 112-113

**bank accounts (multiple), obtaining cash balances, 37-39**

**Bar charts, 420**

**base cases, saving scenarios as, 283-284**

**baselines (forecasting), 184-185**  
 examples, 184-185  
 moving average forecasts, 187  
 creating (Analysis ToolPak), 188-189  
 creating (Chart Wizard), 190-191  
 layout (Analysis ToolPak), 189  
 technical characteristics, 184

**beginning inventory, 48**

**Box-Jenkins model (ARIMA), 206**  
 autoregressive component, 207  
 correlograms, 208-209  
 ACFs (autocorrelation functions), 210-211  
 lags, 208-209  
 PACFs (partial autocorrelation functions), 210-211

moving average component, 207  
 regression versus smoothing, 207  
 trend component, 207  
 when to use, 208

### **break-even point, 407**

calculating, 413-417  
 charting, 417-420  
 sales dollars calculation, 417  
 unit costs, 414-416

### **Bubble charts, 420**

#### **budgets**

capital, 180  
 cash, 180  
 development guidelines, 180  
 operating, 180  
 pro forma financial statements  
 creating, 176  
 estimating inventory levels, 177-180  
 planning uses, 180-181  
 quarterly sales projections, 176

#### **business case analysis**

case study example, 257-263  
 developing, 253-257  
 participants, 254  
 payback periods  
 calculating, 265-270  
 shortening, 273-276  
 proposal questions, 255-257  
 qualitative review, 254-255  
 quantitative review, 255-257  
 relevant costs/benefits, 253-257  
 typical activities, 253

#### **business cases, sensitivity analysis, 279-280**

continuing value estimation, 291-292  
 creating (Goal Seek), 294-296  
 discount rate input variations, 292-294  
 IRR calculations, 288-289  
 profitability indices calculations, 290  
 scenario management, 280-288

#### **business planning, pro forma financial statements, 180-181**

#### **business risk**

financial leverage, 298  
 analyzing, 308-310  
 Debt Ratio calculation, 309  
 Times Interest Earned calculation, 310

#### **operating leverage**

analysis of, 298  
 business forms case study, 298-299  
 coffee sales case study, 304-306  
 comparison of degrees, 300-304  
 DOL planning, 307

## **C**

#### **calculating**

actual cost, fixed assets, 341-342  
 average collection period ratio, 161-162  
 current ratio, 159  
 debt ratio, 157  
 depreciation, 26-27  
 equity ratio, 157  
 future value of money, 270  
 inventory turnover ratio, 162-163  
 IRR, 288-289  
 net present value of money, 271-272  
 original cost, fixed assets, 339-340  
 payback periods, investments, 265-270  
 present value of money, 270  
 profitability indices, 290  
 quick ratio, 160-161  
 replacement cost, fixed assets, 341-342  
 times interest ratio, 158  
 turns ratios, inventories, 75-77  
 working capital, 108-113

#### **capital budgets, 180**

#### **capital expenditures, 119**

#### **cash accounting, 24, 106-107**

#### **cash balances**

Current Assets (balance sheets),  
 obtaining, 34-35  
 multiple bank account, obtaining, 37-39

#### **cash budgets, 180**

#### **cash collection process, revenue recognition**

revenue recognition  
 collection method, 366  
 completed performance method, 366  
 cost recovery method, 365-366  
 installment method, 364  
 proportional performance method, 366  
 specific performance method, 366

**cash flow analysis, 116**

- combining operating/non-operating activities, 122-123

- example, 117-120

- operating activities

- cash outlays for expenses, 122

- cash outlays for purchases, 122

- cash receipts from customers, 121

**cash flow statements, payback periods**

- calculating, 265-270

- shortening, 273-276

**cash outlays for expenses, cash flow analysis, 122****cash outlays for purchases, cash flow analysis, 122****cash payments journal, 81, 88****cash receipts from customers, cash flow analysis, 121****cash receipts journal, 81, 86-88****cash transactions, working capital, 108****cash worksheets**

- credit entries, 33-34

- debit entries, 33-34

- multiple bank accounts, obtaining cash balances, 37-39

- restricted cash accounts, 39-40

- T-accounts, 33-34

**causation (regression analysis), 325-326****cells**

- formulas

- absolute references, 19

- mixed references, 20

- relative references, 19-20

- special characters, 82

- symbols, 82

**Changing Cells dialog (Scenario Manager), 283-284****Chart command (Insert menu), 190****Chart menu commands, 190****chart of accounts, 18-19****Chart Wizard**

- break-even point, displaying, 418-420

- chart types

- Bar, 420

- Bubble, 420

- Line, 419-420

- XY, 419-420

- launching, 190

- moving average forecast, creating, 190-191

- regression forecast, creating, 198-199

**charts**

- break-event point, 417-418

- Bar type, 420

- Bubble type, 420

- Line type, 419-420

- XY type, 419-420

- regression analysis

- creating, 320-325

- intercept, 324

- R squared statistics, 324

- slope, 324

- trendline options, 325

- SPC

- creating via Excel, 231-234

- sample size selection, 226-227

**Choose Data Source dialog box, 371-373****classifying equipment as fixed assets, 341****closing accounts, 47**

- expense account, balance sheets, 49

- inventory account, balance sheets, 48-49

- revenue account, balance sheets, 49

**collecting daily transactions (General Journal), General Ledger, 20-23****collection methods, revenue recognition, 366****commissions, revenue recognition, 366****common sizing, statement analysis, 126****common stock, 151****common-sized balance sheets, converting to, 128-129****common-sized comparative financial statements, converting to, 129-130****common-sized income statements, converting to, 126-128****common-sizing**

- headcount, 139, 141

- leverage versus, 141

- statement analysis, 126

- variance analysis, 135-138

**comparative financial statements, converting to common-sized, 129-130****comparing**

- operating leverage, degrees of, 300-304

- P/E ratios within industries, 145-146

- working capital, changes in, 113-116

- completed performance method, revenue recognition, 366
- completed-contract method, revenue recognition, 360
- confidence intervals, market research scenarios, 315-318
- continuing value, estimating profitability, 291-292
- contra-revenue account, doubtful collectible credit sales, 362
- contribution costing, 428, 433-442
- contribution format method, income statements, 29-30
- contribution margins
  - assignment of costs, 422
  - calculating, 408-410
  - fixed costs, 409-410
  - linear relationships, 421
  - non-linear relationships, 421
  - sales mix, 422-424
  - semi-variable costs, 409-410
  - variable costs, 408-410
  - worker productivity, 422
- control limits, X-and-S charts, 220
- converting
  - balance sheets, common-sized, 128-129
  - comparative financial statements, common-sized, 129-130
  - income statements, common-sized, 126-128
- CORREL function, autocorrelation, 202-203**
- correlograms, Box-Jenkins model (ARIMA)
  - ACFs (autocorrelation functions), 210-211
  - lags, 208-209
  - PACFs (partial autocorrelation functions), 210-211
- cost of goods reporting, income statements, 16
- Cost of Goods Sold (COGS), inventory, 48
- cost recovery method, revenue recognition, 365-366
- cost/benefit analysis, business cases, 253-257
- costs, assignment of (contribution margin analysis), 422
- COUNT function, dynamic name ranges (journals), 85
- Counter object variable (FIFO method), 65
- Create Data Source dialog, 371
- Create New Data Source dialog, 373
- credit entries
  - cash worksheets, 33-34
  - T-accounts, 33-34
- credit sales
  - accounts receivable balances, obtaining, 40-41
  - doubtful accounts
    - aging approach, 41-43
    - percentage of sales approach, 41, 44
  - revenue recognition, 362
- CRITBINOM function, 246-248**
  - acceptance sampling, 237
  - case studies, 249
- Criteria pane (Microsoft Query), 377-379**
- cross-elasticity, effect on prior products, 442-444
- current assets, working capital, 107
  - adjusted trial balances, 108-110
  - cash transactions, 108
  - structuring balance sheets, 112-113
  - structuring income statements, 111-112
- Current Assets (balance sheets), 32-33**
  - accounts receivable balances, obtaining, 40-41
  - cash balances, obtaining, 34-35
  - prepaid expense balances, obtaining, 44-46
  - restricted cash accounts, 39-40
  - working capital calculations, 108-116
- Current Liabilities (Balance Sheet), 33**
  - Accounts Payable, 102-103
  - Interest Payable, 103
  - Long-Term Debt, 103
  - Notes Payable, 102-103
  - Salaries Payable, 103
  - Taxes Payable, 102
  - Unearned Revenue, 103
  - working capital calculations, 108-116
- current ratios, calculating, 159

## D

### daily transactions (General Journal)

- collecting in General Ledger, 20-23
- importing into Excel, 18-19

### damping factors, Exponential Smoothing dialog, 201

### DAO (Data Access Objects) model, 401-402, 406

### Data pane (Microsoft Query), 377

### data sources, specifying ODBC queries in, 371-373

### database objects, VBA, 395-397

#### databases

- queries, security settings (Query Wizard), 383-384
- updating via
  - ADO, 402-406
  - Excel workbooks, 399-402, 406
  - VBA, 393-399

### DB function, declining balance depreciation, 345

- nonstandard calculations, 346
- rounding errors, 346
- sudden acceleration, 346-347

### DDB function, declining balance depreciation, 348-349

#### debit entries

- cash worksheets, 33-34
- T-accounts, 33-34

#### Debt Ratio

- calculating, 157
- financial leverage, determining, 309

#### decision-making

- financial accounting, 12-13
- management accounting, 12-13
- regression analysis, 319-325

### declining balance depreciation, DB function, 345

- nonstandard calculations, 346
- rounding errors, 346
- sudden acceleration, 346-347

### degree of operating leverage. *See* DOL

#### depreciation

- accrual accounting, 26-27
- assets
  - accelerated method, 344, 347
  - declining balance method, 345-347

- double declining balance method, 348-349
- straight-line method, 342-345
- sum-of-year's-digits method, 351-352
- variable declining balance method, 349-351

calculation of, 26-27

### designing balance sheets, 32-33

### developing budgets, guidelines for, 180

### dichotomies, P-charts, 224-225

### discount rates, business case input variations, 292-294

### DOL (degree of operating leverage), 302-303

- as managerial planning tool, 307
- calculating, 302-304
- coffee sales case study, 304-306

### dollar changes, viewing statement analysis, 131-133

#### dot notation, 95

### double declining balance depreciation

- DDB function, 348-349
- VDB function, 349-351

### double-entry accounting, 87

### doubtful credit accounts

- aging approach, 41-43
- percentage of sales approach, 41, 44

### dynamic name ranges (journals)

- COUNT function, 85
- OFFSET function, 83-86

## E

### earnings, income statement reporting methods, 13-17

### earnings per share (EPS), calculating, 150-151

### EBITDA (Earnings Before Interest, Taxes, Depreciation and Amortization), 136

### Edit in Formula Bar item, 134

### editing record values, VBA external database updates, 395-399

### employees, commission plans, 366

### ending inventory, 48

### EPS (earnings per share), 150-151

#### equipment

- depreciation, calculation of, 26-27
- fixed assets, classifying, 341

### equity ratio, calculating, 157

**Error Checking Options item, 134**  
**error handling, worksheets, 133**

- variables, dependent/independent, 326-333**
- variance analysis, common-sizing, 135-138**
- varying discount rate input, 292-294**
- VBA**
  - database objects, 395-397
  - external database updates, 393
    - editing record values, 395-399
    - structuring worksheets, 394
- VDB function, declining balance depreciation, 349-351**
- vertical ratio analysis, 146-149**
- viewing statement analysis**
  - by dollar changes, 131-133
  - by percentage changes, 131-133

## W

- web queries, creating, 389-390**
- Western Electric rules, out of control process indicators (SPC), 227-229**
- work in progress, inventory valuation, 52**
- workbooks**
  - databases, updating, 399-406
  - Journals.xls, 100-102
  - ledgers, opening in, 100-102
  - Ledgers.xls, 100-102
  - sheet level names, 35-37
- worker productivity (assignment of), contribution margin analysis, 422**
- working capital, 107**
  - adjusted trial balances, 108-110
  - balance sheets, structuring, 112-113
  - calculating, 108-113
  - cash transactions, 108

changes, comparing, 113-116  
income statements, structuring, 111-112  
sources, 120-121  
uses, 120-121

#### **worksheets**

error handling, 133  
external data ranges, 381-382  
    automatic refreshes, 384-385  
    importing data to Pivot Tables, 385-389  
    managing security information, 382-384  
    setting data range options, 385  
structuring, VBA external database updates, 394

Lower Control Limit (LCL), 219  
manufacturing case study, 220-223  
Upper Control Limit (UCL), 219  
variable display, 217-218

**XML, creating web queries, 389-390**

**XY charts, 419-420**

## **Z**

**zero defects manufacturing, 215, 234**

## **X - Y**

**X-and-MR charts, 218, 231**

**X-and-R charts, 218**

**X-and-S charts, SPC**

Center Line (CL), 219  
control limits, 220
