

Introduction

Want to be your own boss? Want to make a decent living selling online? Want to build your own successful eBay business?

Others have done it. Others have turned simple eBay selling into a profitable business. Others have figured out how to run a profitable business on eBay.

What do these sellers know that you don't? You'd be surprised; there are a lot of tricks involved in building a successful eBay business.

One hundred and one of those tricks are presented in this book, *Tricks of the eBay Business Masters*. One hundred and one tricks that show you how to sell profitably and successfully on eBay. One hundred and one tricks that show you how to grow your business into one that provides a full- or part-time income for you and your family.

What kinds of tricks am I talking about? Well, you'll have to read the book to find out, but in general these are tricks that help you plan for growth, locate and purchase inventory to sell, create effective auction listings, pack and ship efficiently, and manage your business and business growth.

Want to know what products to sell? That trick is in the book. Want to find out the best service to use for shipping your products? That trick's here, also. Want to learn how to increase your profit on every item you sell? That's here, too.

Where do these tricks come from? I've garnered these tricks from years of personal selling on eBay, and from observing hundreds of successful eBay sellers over those years. The tricks come from those who've learned how to do it themselves—the eBay business masters who run their own successful eBay businesses.

You can use the tricks in this book as a step-by-step guide to planning and building your eBay business—or, if you're already selling, you can use these tricks to help you sell more and more profitably. Whether you're a big or a small seller, you'll find more than a few tricks in this book that will help you become more successful.
